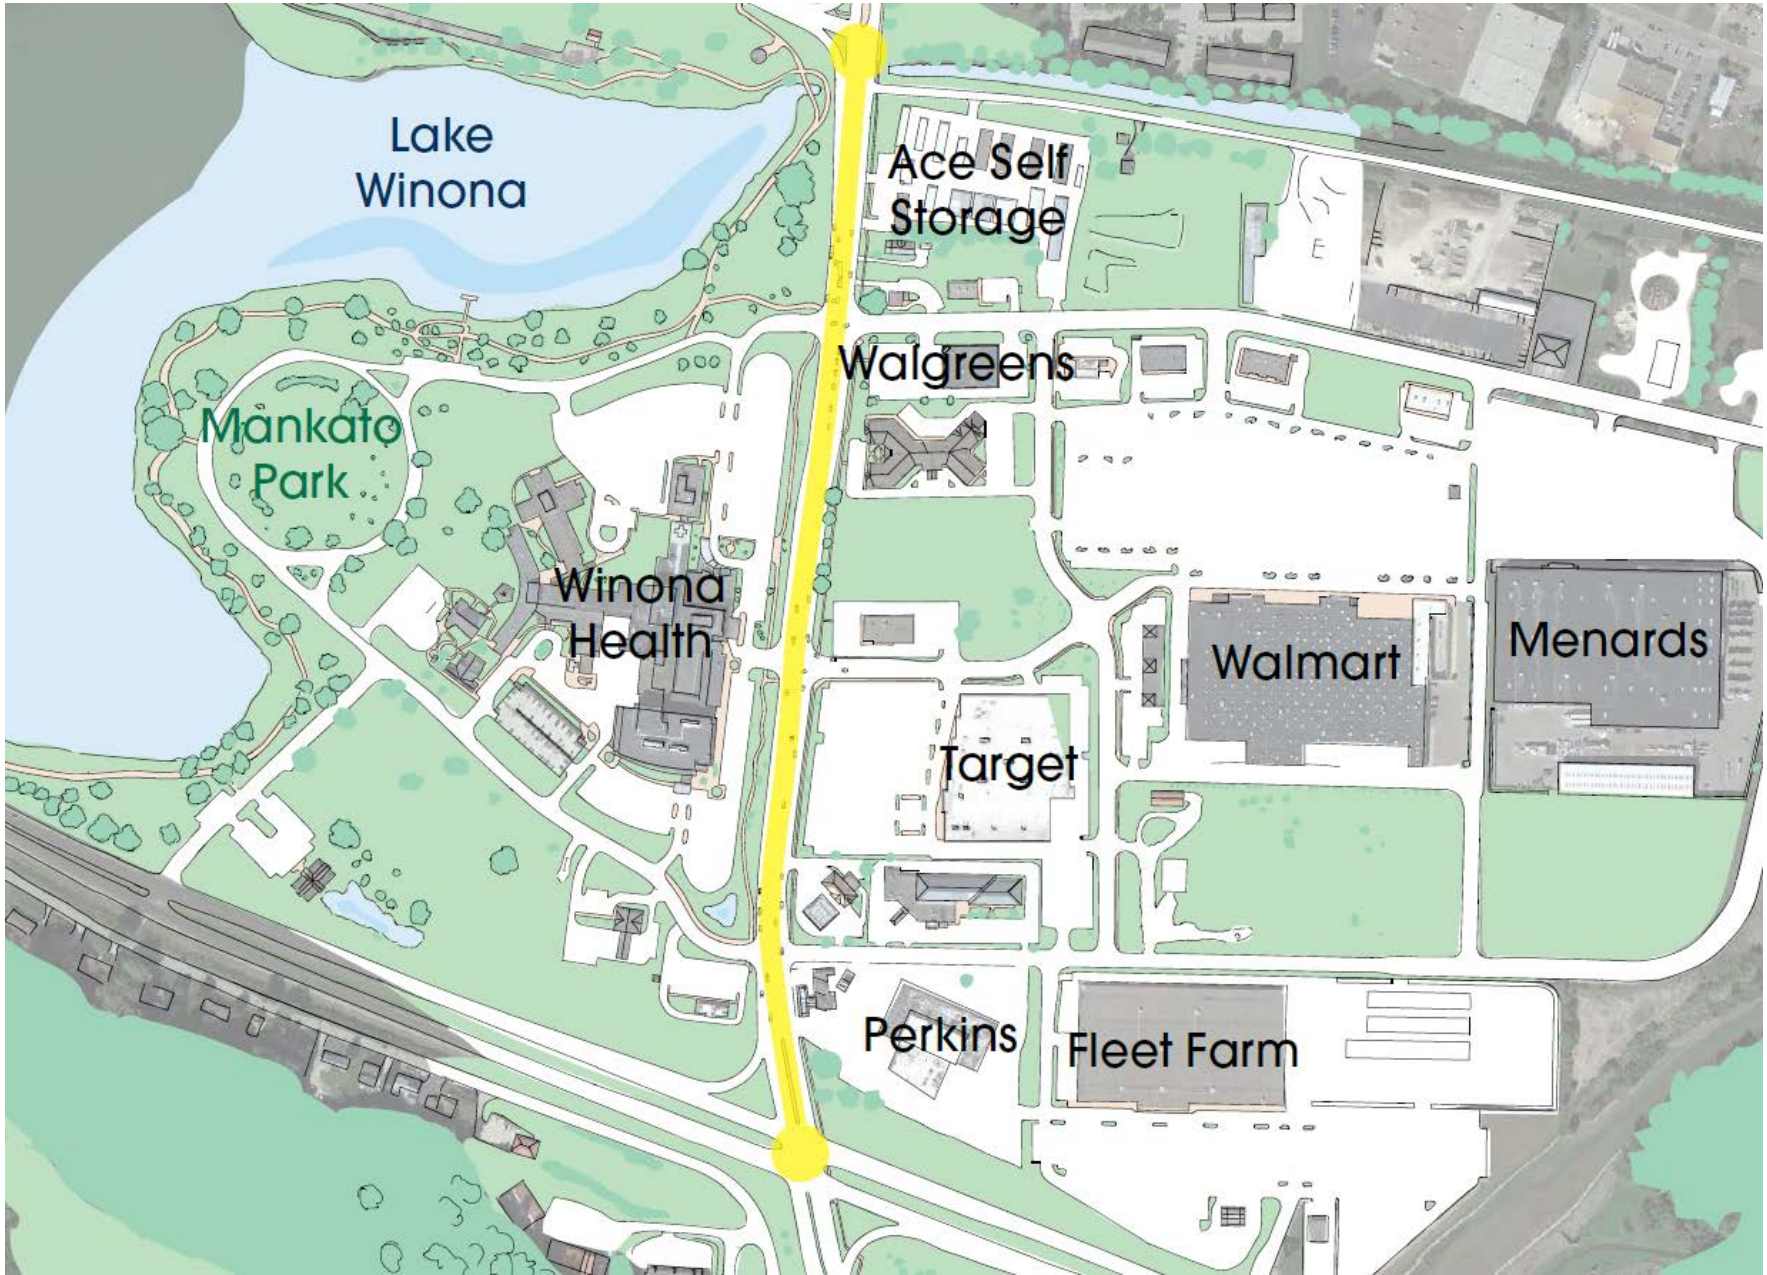
About the Project

DEPARTMENT OF TRANSPORTATION

WINONA

Stantec

Project Location



Project Purpose

- Important and heavily-utilized corridor.
- Serves as the single artery on the east side of Lake Winona.
- Doubles as Highway 43 (the only route to cross the Mississippi River for nearly 30 miles in either direction).
- The intersection with Highway 61 serves as a critical access point between Winona, I-90 and the greater region.
- Serves as an entryway to Winona from the south.
- Mankato Ave requires a full reconstruction between Highway 61 and the intersection with Sarnia Street.
- The reconstruction is anticipated to take place in 2022.
